Summary

With over 2 years of experience working as a full-stack developer using React.js and Next.js for the front end and Node.js for the back end, I am proficient in various SQL and NoSQL databases and have complete mastery of the popular framework Next.js. Creating complex platforms and large scale platforms such as website builders, various CRM and CMS systems, implementing modern designs, and developing 3D websites are key capabilities of mine.

Work Experience

Fullstack developer

Freelancer

March 2021 to Now

Full-stack development, web design and web development, graphics and content creation and front-end teaching.

Projects

Portfolio

Description:

On my website, you can find all the information and project samples, as well as my skills and contact details.

Address: <https://webclare.ir/en>

Project Management system (Centralflow)

Description:

This system manages project tasks, resources, and schedules to enhance development efficiency and project management. It was designed to address the needs of micro and macro businesses.

Address: <https://centralflow.ir/en>

NFT & Crypto Platform (Quxland)

Description:

This project was developed in collaboration with a backend developer and will soon be launched in production. Additionally, it challenged and enhanced my skills in web3 and 3D development.
